TECHNICAL DATA SHEET

Petron Plus™ Formula 7 Industrial Super Lube (Liquid) (ISL) is made from a unique formulation of the highest quality petroleum base stocks available fortified with Petron Plus Formula 7 state of the art additive technology to enhance oxidation resistance and provide maximum protection against wear, rust, and corrosion.

Petron Plus ISL is a multi-purpose super lubricant designed for general maintenance use, from home use to heavy industrial plant projects.

It's a non-flammable, non-conductive, super lubricating film that coats and penetrates metal surfaces to provide the longest-lasting lubricating action available (up to ten times the life of other products). This product contains no CFC's which deplete the ozone layer. ISL is the "new standard" in protection.

Petron Plus ISL can be used as a metalworking lube, way oil, or on any vehicle, marine, sports gear or guns, chains, cables, railroad equipment, farm machinery, or earth-moving and off-road equipment.
